

Glastender Seminar Underbar Equipment Design and Layout

Bar design is a special niche of the foodservice industry. Creating an efficient bar layout requires knowledge of the various types of underbar equipment available as well as multiple design principals. Seminar participants will be exposed to all the different types of underbar equipment available and gain the knowledge necessary to effectively design and review bar layouts.

This seminar offers 4 Continuing Education Units, which will be reported directly to FCSI Headquarters for FCSI members.

For additional information on the CPG program visit <http://www.fcsi.org/about-fcsi/divisions/the-americas/professional-growth/>
