

PASS-THRU COCKTAIL STATIONS

Ever have a customer wait for a drink?

Why not double your bartender's output!

Teamwork is the key. A Glastender Pass-Thru Cocktail Station lets your bartender and cocktail servers share the work for optimal time-saving service. Your bartender can concentrate on making drinks because cocktail servers wash glasses and prep their own orders, doubling bartender output.

Features

With many features located in one compact space, the Glastender Pass-Thru Cocktail Station is designed to save time by distributing the work load between your bartender and cocktail servers, resulting in faster service and happier customers!

Glastender manufactures a large variety of pass-thru cocktail stations. The CS-72-CCW model is detailed above. Please reference our product directory or spec sheets on our web site for additional models and information.
