

Say **NO** To **Crack**

Typical silicone-filled seam design

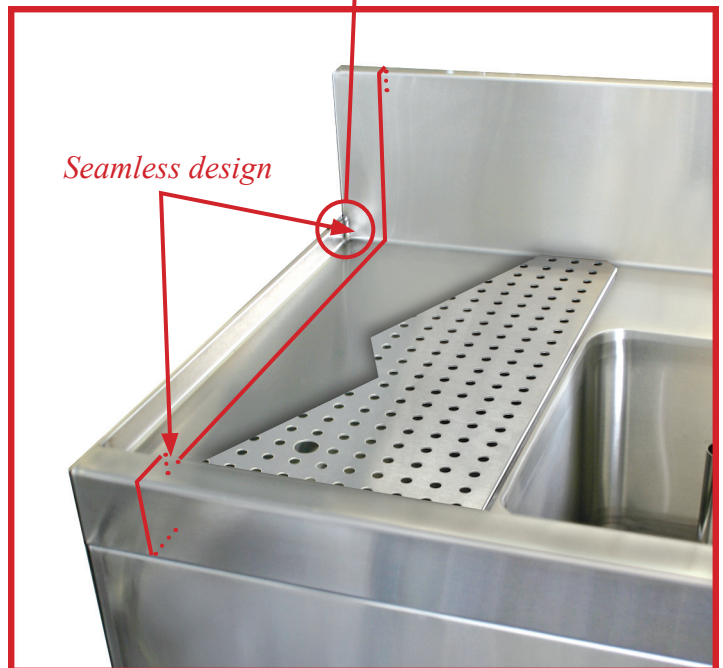

Glastender's seamless work surface design

Our underbar units† have a seamless work surface free of cracks and crevices, creating a more durable product that is easier to clean. Fabricating a seamless work surface is an ambitious endeavor, but well worth the effort. If it were a simple process, everyone else would be doing it too.

†Note: Does not apply to corner drainboards.

(Perforated insert shown cut away for illustrative purposes.)
