The GW24 glasswasher uses up to 59% less water per glass than traditional rotaries. You’ll likely experience even greater savings since traditional rotaries often run continuously with only partially full conveyors. Less water means less chemicals and big savings for you.

“Since replacing my previous rotary glasswasher with Glastender’s GW24, I am saving over $200* a month in chemicals alone!”
- Spencer Dambro, Owner
  Spencer’s Route 46, Saginaw, Michigan
